Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Status of the Claims and Examination

Claims 1-41 and 44-56 are pending. However, claims 29-35 and 44 are withdrawn from consideration as they are drawn to a non-elected invention. Claims 1-28, 36-41 and 45-56 are pending and the subject of this examination.

Applicants' arguments and information disclosures filed on 18 March 2009 have been fully considered but are not deemed to be unpersuasive regarding the previous rejection. Rejections not reiterated from this Office's previous action are hereby withdrawn. The rejections set forth herein constitute the complete set of rejections being applied to the instant application presently.

Claim Rejection – 35 U.S.C. §103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 1614

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-28, 36-41, and 45-56 are rejected under 35 U.S.C. 103(a) as being obvious over U.S. Patent No. 6,342,527 B1 [hereinafter referred to as O'Lenick et al.]" in view of U.S. Patent No. 6,491,927 B1 [hereinafter referred to as "Arnaud et al."].

Applicant's traversal has been fully and carefully considered, but fails to be persuasive. The arguments of this Office's Actions of 05 May 2008, 01 November 2007, 14 February 2007 and 04 September 2008 are incorporated herein by reference in their entirety.

The Applicant argues that one of ordinary skill in the art would not have been motivated to combine the teachings of O'Lenick with that of Arnaud to arrive at the presently claimed invention. And further, that upon consideration of all of the facts, the combination of references does not render the present claims obvious. Additionally, Applicant argues that Arnaud does not remedy the deficiencies in O'Lenick , because it teaches away from the claimed oils recited in the independent claims, implying that some high weight molecular oils do not provide good sensory properties for the disclosed compositions therein. Applicant goes on to say that "one of ordinary skill in the art would necessarily have to pick and choose among the saturated and branched C₂₄-C₂₈ fatty alcohols or fatty acids disclosed in Arnaud." The Examiner disagrees.

Based on the most previous statement, Applicant admits that Arnaud does disclose the oils that are the subject matter of the instant invention. The statement of picking and choosing goes moreso to the breadth of the patent that to its teachings, which cannot be discounted as Applicant attempts here to do. The teaching of Arnaud et al on the face are presumed valid, because they are taught in an issued patent. That Applicant's rationale for combination is wholly

Art Unit: 1614

based on mere speculation and hindsight in view of the teachings in the present application is unpersuasive and appears as but an allegation that lacks persuasive factual support.

With regard to Applicant's reversal of the combination of references premised upon the belief that contrary to Examiner's assertion, there is a lack of overlapping subject matter because the effect of the unique gloss of the composition when applied to the skin present in O'Lenick et al is lacking in the composition of Arnaud et al, the same is not persuasive. While Applicant chooses to focus on the lack of this one element, the Examiner has focused instead her attention on the portion of the subject matter disclosed in both references that is the same and assigned it greater weight when evaluating prior art against the disclosures made of record by Applicant.

For these reasons made previously of record and in light of the foregoing, the rejection of claims 1-28, 36-41 and 45-56 remains proper and is maintained.

Conclusion

No claims are allowed.
